

Lab 05

Statistical Computing & Programming

Announcements

- Homework 04 out today after lab
 - Focus is on using regular expressions and working with spatial data
- Before Wednesday's lecture, install **SelectorGadget**
 - Chrome users should install the Chrome Extension
 - Others should drag the link on the website to your bookmark bar

Today's objectives

- Work on Lab 05, get started by creating your copy of the template repo at <https://classroom.github.com/a/bsQOW5wu>
 - Work in a breakout room with those in your Homework 04 group (see #hw4 channel in Slack)
 - You may need to refresh on **regular expressions**
- Work on spatial exercises (if not explored)
 - **Visualization**
 - **Wrangling**
- Ask questions about recent course material
