Lab 09

Statistical Computing & Programming

Today's objectives

- Ask questions about the project

- Meet with your group to identify a topic of interest

- A few project items to think about:

    - Is the data you want available and accessible?
    - Is your project doable in the timeframe given?
    - Is your idea going to satisfy all requirements?
    - If you are implementing some statistical methodology, is it going to be appropriate given the data?

- Ask questions about recent course material
