

Homework 4 — Project Proposal

Due Tuesday March 5

Write a proposal for the final project. This requires you to pick the type of project (replication, data analysis or original research) and provide sufficient details describing what you will do. Ideally you should come and chat with me sometime before submitting this proposal so we can go over what you want to do. This is especially relevant for the paper replication and data analysis types of projects as it's better to know earlier than later if the choice of paper or dataset are appropriate.
